

## Chip-On-Board (COB) LED Holders

Molex produces a range of solderless chip-on-board (COB) LED holder solutions for mounting COB LED arrays into luminaires. These holders make it very easy to integrate LEDs into a lighting fixture without the need for special tools. Unique compression contacts power the arrays while eliminating solder variability and reducing quality concerns by providing a clean and consistent installation every time. The easy screw-down connection enables lean manufacturing processes and easy integration of the latest chip-on-board LED technology into a luminaire.

With the increased ease of installation, more flexibility in manufacturing and better ways to update a system with the latest LED technology, Molex chip-on-board LED holders help to drive down the overall system cost and increase the reliability of an LED application.

## LED Array Holders
