

0.8mm Height 0805 Package  
Super Bright Red Chip LED  
Technical Data Sheet

Part No :LL-S172SC-2S

## Features

- ◇ Package in 8mm tape on 7" diameter reel.
- ◇ Compatible with automatic placement equipment.
- ◇ Compatible with infrared and vapor phase reflow solder process.
- ◇ Mono-color type.
- ◇ Pb-Free.
- ◇ The product itself will remain within RoHS compliant Version.

## Descriptions

- ◇ The S172 SMD LED is much smaller than lead frame type Components,thus enable smaller board size,higher packing Density,reduced storage space and finally smaller equipment to be obtained.
- ◇ Besides, lightweight makes them ideal for miniature applications.etc.

## Applications

- ◇ Automotive:backlighting in dashboard and switch.
- ◇ Telecommunication:indicator and backlighting in Telephone and fax.
- ◇ Flat backlight for LCD, switch and symbol.
- ◇ General use.

## Package Dimension:

| Part No.     | Material | Lens Color  | Source Color     |
|--------------|----------|-------------|------------------|
| LL-S172SC-2S | GaAlAs   | Water Clear | Super Bright Red |

### Notes:

1. All dimensions are in millimeters (inches).
2. Tolerance is  $\pm 0.10$  (.004") unless otherwise specified.
3. Specifications are subject to change without notice

### Absolute Maximum Ratings at Ta=25℃

| Parameter                                                    | Symbol | Max                                                                      | Unit |
|--------------------------------------------------------------|--------|--------------------------------------------------------------------------|------|
| Power Dissipation                                            | PD     | 65                                                                       | mW   |
| Peak Forward Current<br>(1/10 Duty Cycle, 0.1ms Pulse Width) | IFP    | 60                                                                       | mA   |
| Continuous Forward Current                                   | IF     | 25                                                                       | mA   |
| Reverse Voltage                                              | VR     | 5                                                                        | V    |
| Operating Temperature Range                                  | Topr   | -40℃ to +85℃                                                             |      |
| Storage Temperature Range                                    | Tstg   | -40℃ to +100℃                                                            |      |
| Soldering Temperature                                        | Tsld   | Reflow Soldering:260℃ for 5 Seconds<br>Hand Soldering:350℃ for 3 Seconds |      |

### Electrical Optical Characteristics at Ta=25℃

| Parameter                       | Symbol           | Min. | Typ. | Max. | Unit | Test Condition   |
|---------------------------------|------------------|------|------|------|------|------------------|
| Viewing Angle*                  | 2 $\theta$ 1/2   | ---  | 120  | ---  | Deg  | (Note 2)         |
| Forward Voltage                 | VF               | ---  | 1.8  | 2.5  | V    | IF =20mA         |
| Reverse Current                 | IR               | ---  | ---  | 10   | μA   | VR=5V            |
| Peak Emission Wavelength        | $\lambda$ p      | 635  | 660  | ---  | nm   | IF=20mA          |
| Dominant Wavelength             | $\lambda$ d      | 633  | 640  | ---  | nm   | IF=20mA (Note 3) |
| Spectral Line Half-Width        | $\Delta \lambda$ | 35   | 40   | 45   | nm   | IF=20mA          |
| Luminous Intensity<br>(Note 1)* | Iv               | 7    | 13   | ---  | mcd  | IF =20mA         |

- Luminous Intensity Measurement allowance is  $\pm 10\%$
- $\theta_{1/2}$  is the off-axis angle at which the luminous intensity is half the axial luminous intensity

## Reliability Test Items And Conditions

The reliability of products shall be satisfied with items listed below.

Confidence level:90%

LTPD:10%

### 1)Test Items and Results

| No. | Test Item                      | Test Hours/Cycles | Test Conditions                         | Sample Size | Ac/Re |
|-----|--------------------------------|-------------------|-----------------------------------------|-------------|-------|
| 1   | Resistance to Soldering Heat   | 6 Min             | Tsld=260±5℃,<br>Min. 5sec               | 25pcs       | 0/1   |
| 2   | Thermal Shock                  | 300 Cycles        | H:+100℃ 5min ∫<br>10 sec<br>L:-10℃ 5min | 25pcs       | 0/1   |
| 3   | Temperature Cycle              | 300 Cycles        | H:+100℃ 15min ∫<br>5min<br>L:-40℃ 15min | 25pcs       | 0/1   |
| 4   | High Temperature Storage       | 1000Hrs.          | Temp:100℃                               | 25pcs       | 0/1   |
| 5   | DC Operating Life              | 1000Hrs.          | If=20mA                                 | 25pcs       | 0/1   |
| 6   | Low Temperature Storage        | 1000Hrs.          | Temp:-40℃                               | 25pcs       | 0/1   |
| 7   | High Temperature/High Humidity | 1000Hrs.          | 85℃/85%RH                               | 25pcs       | 0/1   |

### 2)Criteria For Judging The Damage

| Item               | Symbol | Test Conditions | Criteria for Judgement |            |
|--------------------|--------|-----------------|------------------------|------------|
|                    |        |                 | Min                    | Max        |
| Forward Voltage    | VF     | If=20mA         | —                      | F.V.*)×1.1 |
| Reverse Current    | IR     | VR=5V           | —                      | F.V.*)×2.0 |
| Luminous Intensity | IV     | If=20mA         | F.V.*)×0.7             | —          |

\*)F.V.:First Value

## Typical Electrical / Optical Characteristics Curves

(25°C Ambient Temperature Unless Otherwise Noted)

## Reel Dimensions

## Carrier Tape Dimensions: Loaded quantity 3000 PCS Per reel

## Please read the following notes before using the datasheets

### 1. Over-current-proof

Customer must apply resistors for protection , otherwise slight voltage shift will cause big current change ( Burn out will happen ).

### 2. Storage

2.1 Do not open moisture proof bag before the products are ready to use.

2.2 Before opening the package, the LEDs should be kept at 30°C or less and 90%RH or less.

2.3 The LEDs should be used within a year.

2.4 After opening the package, the LEDs should be kept at 30°C or less and 70%RH or less.

2.5 The LEDs should be used within 168 hours (7 days) after opening the package.

2.6 If the moisture adsorbent material (silica gel) has faded away or the LEDs have exceeded the storage time, baking treatment should be performed using the following conditions.

Baking treatment:  $60 \pm 5^{\circ}\text{C}$  for 24 hours.

### 3. Soldering Condition

#### 3.1 Pb-free solder temperature profile

3.2 Reflow soldering should not be done more than two times.

3.3 When soldering, do not put stress on the LEDs during heating.

3.4 After soldering, do not warp the circuit board.

### 4. Soldering Iron

Each terminal is to go to the tip of soldering iron temperature less than  $260^{\circ}\text{C}$  for 5 seconds within once in less than the soldering iron capacity 25W. Leave two seconds and more intervals, and do soldering

of each terminal. Be careful because the damage of the product is often started at the time of the hand solder.

## 5.Repairing

Repair should not be done after the LEDs have been soldered. When repairing is unavoidable, a double-head soldering iron should be used (as below figure). It should be confirmed beforehand

whether the characteristics of the LEDs will or will not be damaged by repairing.
