

Precision Thin Film Chip Resistors

PFC Series

- Available in 0603, 0805, 1206, 1505, 2010 and 2512 chip sizes
- Standard 60/40 and lead-free terminations available
- Tested for COTS applications
- Absolute TCR to $\pm 10 \text{ ppm}/^\circ\text{C}$
- Mil screening available

The IRC TaNFilm® PFC chip resistor series provides the high precision and ultra stable performance of our Tantalum Nitride Resistive Film System in 0603, 0805, 1206, 1505, 2010 and 2512 sizes. The unique characteristics of the passivated Tantalum Nitride film insure long term life stability and stability in most environments.

Using the same manufacturing line as the PFC Military Series, IRC's precision chips maintain the same superior environmental performance. Specially selected materials and processes insure initial precision is maintained in the harshest surface mount soldering environment. Solder coated wrap-around terminations with leach-resistant nickel barriers insure high integrity solder connections.

Mil-Screened Precision Chip Resistors

IRC's PFC chip resistors are available with Mil screening. These chips are manufactured on the same production line as our Mil-qualified chip resistors and screened in accordance with MIL-PRF-55342. These chips are identified with IRC's ordering information and not with Mil marking.

Please refer to our PFC Military datasheet for parts qualified to MIL-PRF-55342.
