

G9EB-1-B-AQ

DC Power Relay (20A type)

Capable of Interrupting High-voltage, High-current Loads

- Utilize a unique gas-filled, fully sealed, non-ceramic construction achieved by using resin with a metal case. This reduces the need for special processing and materials that were required with previous models, and it result in cost-saving, downsizing and light-weight.
- Our own design of permanent magnet for ark blowout achieved a nonpolar on the main contact circuit (contact terminal). This improves ease of wiring and installation, and become a foolproof to pretend incorrect wiring.

■ Ratings

● Operation coil

Rated voltage (V)	Rated current (mA)	Coil resistance (Ω)	Operating voltage (V)	Release voltage (V)	Maximum voltage (V)	Power consumption (W)
DC 12	207	58	75% or less of rated voltage	8% or more of rated voltage	130% of rated voltage (at 23°C within 10min.)	Approx. 2.5
DC 24	104	230.4				

Note:1. Values of the rated current and the coil resistance are at coil temperature of +23°C, and have a tolerance of $\pm 10\%$
2. The figures for the operating characteristics are at a coil temperature of 23°C.
3. Value of the maximum voltage is the maximum voltage that can be applied to the relay coil.
