Features and benefits

- High component values optimized for common and differential mode attenuation in the lower frequency range make this filter ideal for a large variety of single-phase motor drive applications.
- Supplied in a relatively small housing design with safety terminal blocks for fast and easy installation in primarily industrial environments.
- FN 350 also meets IEC60950 requirements, thus providing additional application flexibility.

Typical applications

- Single-phase motor drives
- Automation equipment
- Power supplies, SMPS
- Office equipment
- Testing and measurement equipment
