

Thin Film, Rectangular, Resistor Chips

TNPW Precision Thin Film Flat Chip Resistors are the perfect choice for most fields of modern electronics where reliability and stability is of major concern. Typical applications include telecommunication, industrial, medical equipment, high-end computer and audio/video electronics.

FEATURES

- Metal film layer on high quality ceramic
- Protective top coat
- Available with tin lead or lead (Pb)-free solder contacts
- Excellent stability at different environmental conditions
- Low temperature coefficient and tight tolerances

APPLICATIONS

- Automotive
- Telecommunication
- Medical Equipment
- Industrial Equipment

¹⁾ ±1% resistors are only available in E24/E96

²⁾ Size not specified in EN-140401-801

- Extended values available on request

- Power rating depends on the max. temperature at the solder point, the component placement density and the substrate material
- TNPW 0402 without marking

¹⁾ R52 and E52 only for precision resistors with tolerance $\pm 0.1\%$ and temperature coefficient $\leq \pm 25$ ppm/k

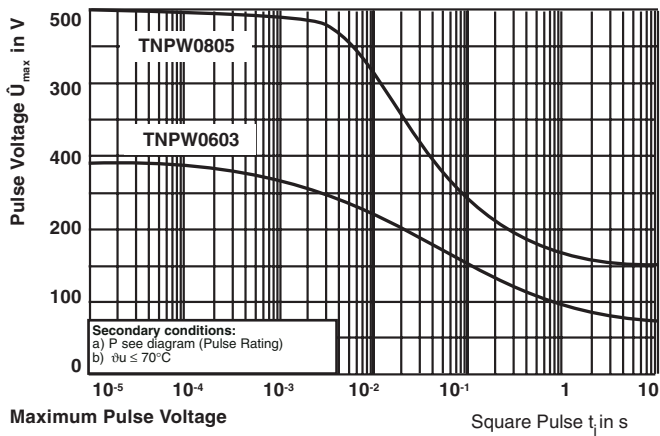

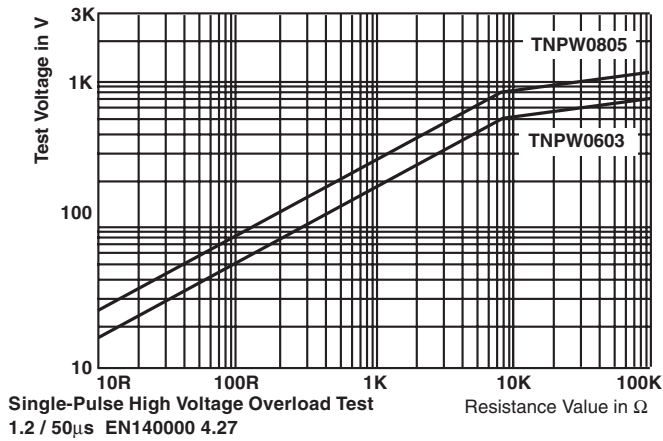

DESCRIPTION

Production is strictly controlled and follows an extensive set of instructions established for reproducibility. A homogeneous film of metal alloy is deposited on a super high grade ceramic substrate and conditioned to achieve the desired temperature coefficient. A special laser is used to achieve the target value by smoothly cutting a meander groove in the resistive layer without damaging the ceramics.

ASSEMBLY

The resistors are suitable for processing on automatic SMD assembly systems. Beside tin lead termination TNPW is also available with Lead (Pb)-free pure tin termination. The pure tin plating of the Lead (Pb)-free resistors type, provides compatibility with Lead (Pb)-free and lead-containing soldering processes. The immunity of the plating against tin whisker growth has been proven under extensive testing.

PERFORMANCE				
TEST	CONDITIONS OF TEST	TEST RESULTS		
		TNPW0402 TO TNPW2512		
		TOLERANCES		
		± 0.1 % ; ± 0.25 %		± 0.5 % ; ± 1.0%
