The parking meter gives change – four face values of notes and is equipped with 10.4" display with touch screen, notes receiver, contactless parking cards reader, GSM radio channel module, dispenser for change return by means of notes, GSM radio channel module, vandal proof PIN-keyboard with bank payment cards reader, bar code scanner.

Payment terminals of the automatic and semi-automatic parking are used mainly.

Both parking meters of the sidewalk parking and payment terminals of the automatic and semi-automatic parking are used.

GENERAL SYSTEM OF UNIFIED PARKING SPACE OF THE CITY

The parking meters which are a part of parkings of sidewalk type and also payment terminals of automatic parking may be united in the general wireless system of united parking space of the city with a possibility of remote monitoring in real time mode.

Parking entry/exit terminals

Main elements of parking are stands which are controlled by turnpikes, traffic lights and other parking system devices.

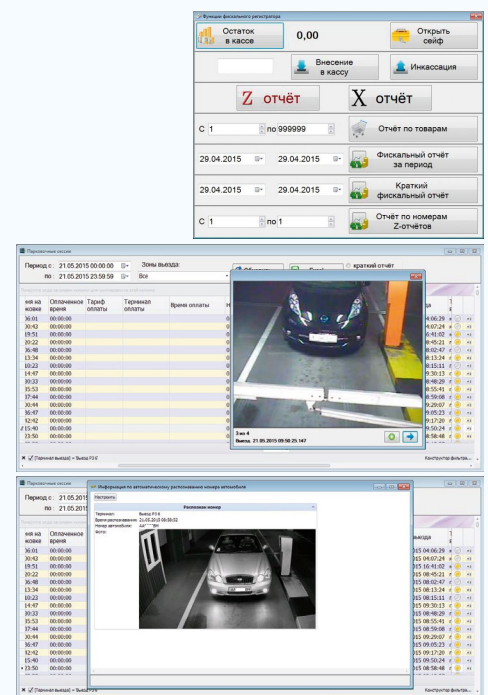

SEA company produces entry/exit stands with various complete set for all types of automated parkings, namely: single-level, multilevel, built-in; equipped with parking cards, soft paper cheques or firm stubs. May also be equipped by E-Marine or Mifare card reader, «driver-operator» intercommunication device, photo fixing of driver and other.

Two-level stands are ideal for the organization of automatic and semi-automatic parkings of bus and railway stations, as well as for different types and dimensions vehicles parkings.

Main advantages of SEA parking systems:

- Parking complexes work in the mode 24/7/365
- Flexibility of a configuration of parking systems of any complexity on the basis of a standard set of the equipment and the software
- Possibility of simple modernization or expansion of functionality of parking complexes
- Parking meters of «SEA AP 100» series are entered in the State register of registrars of clearing transactions, they have Certificate of Compliance as well as Certificate of National Electronic Payments System, Certificate of Production
- Warranty and post warranty service
- Easy integration into the general monitoring system or dispatching of similar complexes at unified center
- Competitive price for parking equipment installation of systems in general
